Professional Summary:

Data Engineer with 5+ years of experience designing and developing scalable cloud-native ETL/ELT solutions in the Healthcare domain. Skilled in AWS Glue, EMR, Step Functions, Lambda, S3, Snowflake, Databricks, Python, PySpark, and SQL, with expertise in metadata-driven framework development, automated extract generation, incremental data processing, and large-scale data migration. Experienced in integrating Databricks SQL Warehouses and Unity Catalog with AWS Glue pipelines, building production-ready data pipelines, implementing data quality and audit controls, optimizing performance, and supporting enterprise-scale cloud data platforms.

Technical Skills:

- **Programming & Scripting:** Python, PySpark, SQL, dbt, Shell Scripting
- **AWS & Cloud Services:** AWS Glue, EMR, Lambda, Step Functions, S3, Secrets Manager, KMS, CloudWatch, Athena, Redshift, RDS, IAM, EC2, SNS, SQS
- **Data Warehousing & Databases:** Snowflake, Databricks (SQL Warehouses, Unity Catalog), Amazon Redshift, Teradata, MySQL, PostgreSQL
- **Data Engineering & ETL/ELT:** Metadata-Driven ETL Frameworks, AWS Glue, Informatica PowerCenter, Apache Airflow, Incremental Processing, Data Validation, Audit Frameworks, Data Migration
- **File Processing:** CSV, TXT, JSON, Parquet, Fixed-Width, Pipe-Delimited, GZIP, ZIP
- **DevOps & Tools:** Git, GitHub, Bitbucket, GitHub Actions, Bitbucket Pipelines, JIRA, VS Code, SQL Developer, DBeaver, Postman
- **Production Support & Methodologies:** CloudWatch Monitoring, Performance Tuning, Root Cause Analysis, Incident Management, Agile, Scrum, SDLC, Code Reviews

PROFESSIONAL EXPERIENCE:

Carelon Global Solutions (Elevance Health) | Software Engineer II

Jan 2025 - Present | Gurugram, Haryana

Project: Anthem Enterprise Data Lake (AEDL)

- Designed and enhanced a metadata-driven Extract Generation Framework using AWS Glue, PySpark, S3, Snowflake, and Databricks, enabling configuration-based onboarding of new extract pipelines.
- Extended the framework with a Databricks source connector, enabling Glue PySpark jobs to extract Unity Catalog data from Databricks SQL Warehouses over Spark JDBC alongside existing Snowflake and RDS sources through a single metadata configuration.
- Built a reusable Python Databricks connector with OAuth M2M service principal authentication, credentials sourced from AWS Secrets Manager, configurable SQL Warehouse sizing, and support for the Databricks SQL Connector, SDK, and Databricks Connect (serverless and cluster compute).
- Developed scalable ETL/ELT pipelines supporting incremental processing, audit logging, record count validation, and automated file generation.
- Implemented support for CSV, TXT, fixed-width, delimited, and compressed (GZIP/ZIP) file generation with optimized handling of large-volume datasets.
- Integrated Snowflake, Databricks, AWS Secrets Manager, KMS, and cross-account S3 workflows to support secure and reliable data movement.
- Optimized PySpark jobs, Snowflake and Databricks SQL queries, and Spark partitioning, improving pipeline performance and operational efficiency.
- Provided production support for enterprise data platforms, troubleshooting data quality, AWS permissions, file processing, and pipeline failures.

Project: DX Applications - Production Support

- Supported DXNA, DXAA, and DXEDW applications by resolving production issues, performing root cause analysis, and implementing long-term fixes to improve application stability.

Tata Consultancy Services (TCS) | AWS Data Engineer

Feb 2022 - Jan 2025 | Noida, Uttar Pradesh

Client: Eli Lilly | Projects: AADS, AET, IQVIA

- Developed and maintained cloud-based ETL pipelines using AWS Glue, PySpark, Lambda, S3, and Snowflake.
- Contributed to Teradata-to-Snowflake migration initiatives, including data extraction, transformation, validation, and reconciliation activities.
- Built automated data ingestion and processing workflows, reducing manual effort and improving data delivery efficiency.
- Implemented secure cloud solutions using IAM roles, CloudFormation, and AWS best practices.
- Collaborated with cross-functional teams to optimize data pipelines, troubleshoot production issues, and support cloud platform enhancements.

GlobalLogic Technologies Pvt. Ltd. | Associate Analyst – Content Engineer (Contract)

Jan 2022 – Feb 2022

- Executed content tagging, validation, and data quality activities for technical knowledge management projects.
- Collaborated with cross-functional teams to ensure content consistency, accuracy, and process compliance.

ILJIN Electronics (I) Pvt. Ltd. | Graduate Engineer Trainee

Jul 2021 – Jan 2022

- Applied data-driven analysis within the Production Planning & Control (PPC) team to monitor manufacturing operations and improve process efficiency.
- Developed Excel and SQL-based reports and dashboards to track production KPIs and support operational decision-making.
- Performed production data analysis to identify process bottlenecks and improve planning accuracy.

Education:

Bachelor of Technology (Electrical & Electronics Engineering)

Galgotias College of Engineering and Technology, Greater Noida, Uttar Pradesh
Graduated: Oct 2020

Key Highlights:

- Designed and enhanced a metadata-driven Extract Generation Framework using AWS Glue, PySpark, S3, Snowflake, and Databricks.
- Integrated Databricks SQL Warehouses and Unity Catalog into AWS Glue extract pipelines using secure OAuth M2M service principal authentication.
- Built scalable ETL/ELT pipelines supporting incremental processing, audit controls, and automated file generation.
- Contributed to Teradata-to-Snowflake migration and large-scale data processing initiatives.
- Developed data validation and reconciliation frameworks to improve data quality and reliability.
- Experienced in production support, performance optimization, and troubleshooting AWS, Snowflake, and Databricks-based data platforms.

Professional Attributes:

- Strong analytical and problem-solving skills with expertise in root cause analysis and performance optimization.
- Effective collaborator with experience working in Agile/Scrum environments and cross-functional teams.
- Proactive and detail-oriented, with ownership of end-to-end data pipeline development and support.
- Committed to delivering scalable, reliable, and production-ready data solutions.
